Definitions

Commercial Customer – Where water supplied is used in a commercial activity on the property to generate income. (e.g. Hotel, Villas, Gas Station, Restaurants and Hardware etc.)

Domestic Customer – Where water supplied to property is used for non-commercial activities and is for normal residential purposes.

Condominium Customer – is a customer registered as Proprietor Strata Plan and the water supplied is used for domestic purpose.

Introduction

The Runaway Bay Water Company Limited (RBWC) although incorporated on January 17, 1968, started operations from 1957 from a Well in southern Cardiff Hall, Runaway Bay, St. Ann, to provide potable water for the developers of the Cardiff Hall Estate, into a high end residential community and the Jamaica Jamaica Hotel (now Jewel Runaway Bay) and the Golf Course. Over the years the Company and the development changed various owners. In 1977, the Government of Jamaica (GOJ) turned over ownership to the Urban Development Corporation (UDC) along with the Hotel, Golf Course and unsold lands in Cardiff Hall because the GOJ guaranteed the loan for the development and they defaulted. The Hotel and most of the lands have since been sold, however the RBWC has remained a wholly owned subsidiary of the UDC and in 1989 commissioned another Well at Mount Edgecombe, an adjacent residential community.

In 2014 the Company was granted a license from the Water Resources Authority (WRA) and the Office of Utilities Regulation (OUR) to operate a potable water system and Sewage Service in Caymanas in the parish of St. Catherine. This system was managed by the Director of Caymanas Development Company Ltd (a subsidiary of the UDC) with the RBWC giving technical support. The merger of both entities under one management is being pursued.

The RBWC currently extract, treats and sells an average of 6,000 m³ per day or 2.3 million m³ per annum of potable water from its two Plants in Runaway Bay. Approximately 20% of the potable water produced is sold directly to its 450 Residential and Commercial Customers which include Jewel Runaway Bay, Franklyn D. Resort, Runaway Bay Heart Hotel and the Carl Rattray Training College. The remaining 80% is sold wholesale to the National Water Commission (NWC) for distribution to its customers in adjacent communities. The Caymanas operation services approximately 680 residential customers. It extracts treats and distributes an average of 1200 m³ per day or 0.45 million m³ per annum.

The Company has remained a profitable entity and the competencies of its staff in operating a potable water system have been utilized to assist in the production of potable water at the UDC's

plant at Dunn's River and also to undertake maintenance of large water mains at other UDC facilities.

RBWC's Vision Statement

“To be the best water company in The Caribbean”

RBWC's Mission Statement

The Runaway Bay Water Company (RBWC) is committed to contributing to sustainable economic growth through the provision of potable water that exceeds the needs and expectations of our stakeholders.

Our Pledge

We will endeavour to maximize returns by applying industry best practices along with innovative and effective management of our human and physical resources. We constantly monitor our processes, product and service to identify opportunities for improvement and growth.

Goals and Objectives for 2020 – 2024

The RBWC has set its objectives to complement the 4 objectives of its parent company the Urban Development Corporation.

UDC Objectives

1. To assure the sustained financial viability of the Corporation by increasing our revenues at least 6.5% annually, while decreasing expenses by a minimum of 1% below prior year total expenses compared after accounting for inflation.

RBWC Objectives

- a. Meet or exceed the financial , production, sales and quality targets through prudent management of the company's resources.
- b. Take all possible steps to protect the water shed that supplies the aquifers.

UDC Objectives

2. To plan, implement, manage and facilitate sustainable projects that will contribute to \$16 B in infrastructure investment to the Public Sector Investment Program annually.

RBWC Objectives

- a. Meet all the standards set internationally and by all national regulatory bodies for the potable water and sewage disposal industries.
- b. Ensure that all assets, plant, machinery, equipment and facilities are properly maintained and secured.

UDC Objectives

3. To enhance UDC's brand equity and reputation by utilizing partners and focusing on responsive customer service to achieve a customer satisfaction index of 90% by 2021.

RBWC Objectives

- a. Supply potable water at adequate pressure to all our customers 24 hours per day, 7 days per week. Water pressure of at least 20 psi and chlorine residue of 0.4ppm are to be maintained by having optimally functioning plant, machinery and equipment with a maximum downtime of 4%. Optimum stock of spares and essential inventory to ensure that repairs are carried out within established time frame of 24 hours.
- b. Maintain customer satisfaction by providing potable water and support services that exceed their expectation. Stakeholders will be kept informed of developments that might impact their service via letters emails, text messages, the mass media, town crier and telephone.
- c. Other stakeholders (such as staff, head office, Board, etc.) will be kept informed of the target, by the agreed means of stakeholder information.

UDC Objectives

- 4 To embrace evidence-based performance measurement in all core areas through set standards by accomplishing at minimum 90% of each target in our Divisional and Departmental objectives for each financial year.

RBWC Objectives

- a. Ensure a cadre of trained, motivated and customer oriented staff to service the needs of our customers.

- b. To have OSHA Industry Policies and best practices documented and all other stakeholders sensitized to respond to emergencies, especially to chlorine spill.
- c. To document all Policies, Procedures and Work Instructions for all positions and processes.

Strategic Objective

“To facilitate the parent corporations statutory mandate to be a catalyst for development and also to meet all the local and international W.H.O. standards for potable water both in quality and pressure and also have a highly motivated staff who are focused on satisfying the expectations of the various stakeholders of the company.”

SWOT Analysis

Strengths:

The Company has been able to remain profitable and efficient, because of the following strengths:

1. Highly trained, competent, dependable and motivated staff.
2. The Cardiff Hall Plant operates at 80% of capacity hence potential to increase revenue if customer base should increase
3. Supportive Parent Corporation, proactive Board and Management that is visionary
4. Its parent Corporation employs a high calibre of professionals which include lawyers, various engineers, architects, HRD professionals, information systems and computer experts, accountants, financiers, investment analysts, economists, internal auditors, security specialists, environmentalists and planners, all of whom are readily available to give expert consultation and guidance as the need arises in the Company’s operations.
5. Stable demand for its product and a stable customer base
6. Satisfied customers due to quick resolution of customers queries
7. Consistent profitability to ensure sustainable operations of the Company
8. UFW maintained within the industry standard

Weaknesses:

1. Some of the facilities although functional have exceeded their useful life and need to be replaced
2. Some customers do not pay on time because they expect leniency with disconnection while large
Customers cannot be disconnected, i.e. NWC and the large hotels because of social implications.
3. The limestone in the area poses a challenge because at times underground leaks do not surface and can remain undetected resulting in UFW.

Opportunities:

1. Sells a product that has an inelastic demand with an all year revenue stream
2. With increased development in the Runaway Bay area, there are potential for a significant increase in the customer base and Revenue.
3. Possible expansion to supply the future developments in the Caymanas Area with potable water and sewage services for its residential and planned commercial and industrial developments.
4. More lots in Cardiff Hall are building more townhouses and more apartments; this may increase the customer base. UDC is divesting two major properties in the area for hotel and commercial development.

Threats:

1. The National Water Commission (NWC) the largest customer that buys 80% of water produced and contributes to 30% of the revenue, at times has serious cash flow problems, thus resulting in late collections that affect the company cash flow.
2. NWC is developing other water sources in close proximity, thus there is the possibility that they might stop taking water from RBWC in the medium term.

3. Industry is highly regulated, thus impedes expansion outside the geographical boundaries set by the OUR.
4. The threat of contamination of the aquifers by soak away pits and other industrial and agricultural discharge above the well.
5. Sometimes high receivables due to the effect of adverse economic conditions on some large customers.
6. Technology has made it economical for large hotels to setup water plants thus reducing water consumption from the company.
7. GOJ can decide to divest to the private sector or hand over operations of the company to NWC.
8. Customer can claim that water has harmed person or damaged their equipment.

Strengths and Opportunities (SO)

1. To increase revenue by growth in its customer base; the Company must gear itself to supply water to the potential developments within the distribution areas.
2. Approximately 20% excess capacity at Cardiff Hall can be utilized to supply water to adjacent eastern lands in close proximity that are earmarked for development.
3. Revenues can be increased with the expansion of commercial Industrial and residential development in Caymanas area in St Catherine.
4. The highly skilled and competent staff in potable water production can be utilized at other UDC designated areas like the take-over of the water distribution at Hellshire so that be charged for the sewerage services provided by the UDC.

Strengths and Threats (ST)

1. Potable water is critical to every development and by utilizing the strengths of the Company, that is the company's experienced staff, it can expand its production, sales and revenues. The significant potential for increased revenues could assist in the replacement of aging infrastructure.
2. Utilizing the influence of the UDC to get more timely payments from the NWC and the larger customers.

3. Carry out set monitoring and records to counter any claim of improper treated water by any customer.
4. Continue to be efficient and profitable to delay the possibility of divestment.

Weaknesses and Opportunities (WO)

1. It is hoped that the UDC will sell the undeveloped lands in the Runaway Bay area and these are used for residential , villas and hotels, the customer base will increase, thus providing the revenue to improve the infrastructure of the company

Weaknesses and Threats (WT)

1. The Company will embark on a short medium and long term strategic plan that will analyse the weaknesses and threats to the Company and provide recommendations for the way forward for its sustainability.
2. The UDC has an OHS&A Specialist on staff to help document the systems and procedures to deal with internal chemical threats to staff and to coordinate external stakeholders.
3. To establish a framework to assist the UDC to accomplish its mandate to make development happen

Stakeholder Analysis of the Runaway Bay Water Company Ltd.

Stakeholder's Perspective						R.B.W.C. Perspectives		
Stakeholder	Interests	Influence	Needs	Wants	Expectations	Needs	Wants	Expectations
Customers	High	High	-Reliable, good quality potable water at the appropriate pressure 24/7.	-Lowest possible cost for potable water. Reliable potable water supply at appropriate quality.	Efficient reliable properly treated water 24 hours per day 7 days per week.	-On time payments	-Loyal, polite customers	- Honest, loyal and polite Customers who pay their bills on time.
Parent Company (U.D.C)	High	High	-Consistent revenue stream. Efficiently run Company's and Assets are properly secured and maintained.	-To be the best water provider in Jamaica.	-Efficient profitable organization	-Provide support in HR, IT and Technical services.	-Continue as a subsidiary	-Continued support and remain a Subsidiary.
Regulatory Agencies, O.U.R. W.R.A. N.E.P.A. M.O.H.	High	High	-Compliance to their regulatory standards. -Payment of fees.	-On time reporting of required information and fee payment.	-Compliance with all regulators.	-Proper monitoring	-Assistance to maintain quality.	-Proper timely and fair assessments.
Staff (RBWC)	High	High	-Secured Jobs -To be properly trained in the necessary competence.	-Good salary that meets their needs.	To have a sense of accomplishment and job satisfaction.	-Highly motivate – Loyal, competent customer focus	-The best workers in potable water industry.	-Staff that do their best to achieve the company's objectives.

Risk Analysis of the Runaway Bay Water Company Ltd.

Risk Area	Probability of Risk	Impact of Risk	Risk Exposure	Response (Mitigation/Avoidance /Reduction)	Initiative in Response to Risk
Financial resources – inadequate to cover all its operational costs	Low	High	Low	-The parent company has the financial resources to assist and the product demand is inelastic.	-Prudent management of cash resources.
Human resources – staff motivated, under-compensated and well trained staff may leave for new employment	Low	High	Low	Mitigation This is specialized job is not in great demand.	Introduce staff recognition programmes & incentives.Align positions with competencies; job reclassification to improve competitiveness of compensation packages
Operational - Outdated Plant that has done its useful life.	High	High	High	Mitigation Gradually Annually replacement of critical equipment and plant over the next 5 years.	Improve infrastructure with updated & energy efficient facilities
Customer Service – dissatisfaction with service	Low	Low	Low	Mitigation Maintain reliable facilities trained staff in customer service	Put mechanism in place to ensure all justified complaints are dealt with promptly and adequately and offer continuous reliable service.
Produce Risk –threat to the aquifers that supply the wells	Low	High	High	To have the areas above the well through the WRA, declared a well protection zone by the Minister of Water.	To educate the citizens via the media, of the environment impact and threat of improper disposal of sewage to the aquifers.

GAP Analysis

Perspective	Negative SWOT Factor (Weakness & Threats)	Type	"Gap" Status	Existing Corporate Initiative Addressing Factor	Proposed Priority Level (Gaps)	Comments	Strategies to get there
Financial	High account receivables	Weakness	Is being addressed currently (2020/21)	Reduced receivables	High	This has shown improvement in 2018/2019	<ul style="list-style-type: none"> -Stringent disconnection for non- payment -dialogue with large customers for on-time payment -payment plan for customers having problems to pay
Financial	Complacency in expansion of business	Weakness	Is being addressed currently (2020/21)	UDC Property Optimization	High	Once vacant lots in the area owned by UDC are sold and developed.	-seek opportunities in the UDC designated areas that the RBWC could operate potable water systems
Internal Business Processes	Manual Customer service management	Weakness	Is being addressed currently (2020/21)	Implement Information Systems Strategy	High	Have greatly improved in the use of technology	<ul style="list-style-type: none"> -Greater use of technology to improve service to stakeholder, example: -customers able to access their invoices and make payment online
Internal Business Processes	Limited use of available technology (eg internet/intranet)	Weakness	Is being addressed currently (2020/21)	Implement IS Strategy	High	Great improvement in technology in regards to billing and receipts. On-line billing and payment was implemented in 2019/2020	-Customers easier to lodge complaints online and to make reports of loss of service or make enquiries online or phone and all will be able to be captured, tracked and recorded and resolve satisfactory

Perspective	Negative SWOT Factor (Weakness & Threats)	Type	"Gap" Status	Existing Corporate Initiative Addressing Factor	Proposed Priority Level (Gaps)	Comments	Strategies to get there
Internal Business Processes	Poor communication system	Weakness	was addressed currently (2019/20)	Implement IS Strategy	High	Greatly improved with new CISCO voice over IP System which allows direct connection to Head Office and other UDC subsidiaries	<i>-Strategies to get all production staff online and trained to use new technologies.</i>
Internal Business Processes	Not all staff can use the leave entitlement System	Weakness	was addressed currently (2019/20)	Regular Business Activities	Medium	Production staff will be trained to use the automatic leave system at Head Office	<i>-Staff training for all.</i>
Learning & Growth/People	Low motivation	Weakness	Is being addressed currently (2020/21)	Engagement Campaign	High	HRM are rolling out new engagement campaign for all staff.	<i>-Strategies to get staff engaged and motivated</i>
Customer	Too lenient with delinquent customers	Weakness	was addressed currently (2019/20)	Reduce receivables	High	Vast improvement in Account Receivables that was reflected in the 2019/2020 Audited Financials	<i>-Strategies that the system will automatically identify delinquent customers for action</i>

Runaway Bay Water Company Ltd.

Budget Executive Summary

The Runaway Bay Water Company (RBWC) a wholly owned subsidiary of the Urban Development Corporation (UDC) has prepared its 2020/2021, 2021/2022, 2022/2023 2023/2024 Budgets to augment the goals and objectives of its parent the UDC.

Its plans include the continued prudent management of the Corporation's assets that are placed under its care and to make available the peculiar skills and competencies of its staff to fulfil the Corporation's goals and objectives for the period.

Its budget projects a profitable entity that will also meet the expectation of its external and internal stakeholders. It has expanded its activity to the water operations at Caymanas, to supply water and sewage services to just under 700 residential customers and eventually commercial and industrial customers that are scheduled to come on stream in the near future. As of October 2019 the two operators were merged under one management. This budget will show an increase in salaries, repair & maintenance, electricity for Caymanas Operations and cost of sales which was to transfer income to CDC has ceased.

The Company's Budget is cognizant of this objective and provides for a profit before tax of \$66.0M, \$71.1M, \$77.6M & \$84M respectively over the 4 year budget period ending March 31 2021-2024, after paying the UDC's annual Management Fee of \$56M. The Company employs 21 permanent members of staff at Runaway Bay and 5 at Caymanas (see Organizational Chart attached), nine (9) of which are administrative staff; inclusive of the manager, to take care of the administrative, commercial and accounting activities of the Company that includes preparing monthly invoices, financial reports and collections from customers. There are 15 Systems Operators who work around the clock to carry out the function of monitoring the Cardiff Hall, Mount Edgecombe and daily at Caymanas plants to ensure that water of the highest quality is supplied to its customers and undertake repairs and maintenance of the distribution lines, meters and other facilities. They are supervised by a Systems Supervisor. The current staff complement is adequate to carry out the efficient functions of the company.

Over the 4 years, the company has budgeted \$10.0M, \$10.4M, \$10.9M and \$11.5M respectively to maintain its assets and \$1.6M, \$1.67M, \$1.76M & \$1.8M respectively for continuous training to undertake the Company's mandate. From all surveys done and from the feedback customers are all satisfied with the services of the company.

All line items in the budget were carefully and deliberately analysed and all skills and care were taken to reflect an accurate forecast of the operations and to achieve the corporate objective in the corporate plan.

The main source of income is the abstraction, treatment and distribution of potable water to its over 1000 Domestic and Commercial customers, including 4 large hotels. Approximately 80% of the potable water produced at Runaway Bay is sold wholesale to the National Water Commission for

further distribution to communities in the area and currently just about 700 residential customers in Caymanas Development for whom sewerage services are provided and charges collected. The sewage is transported to the NWC Soapberry plant.

The Budgeted total Sales for the respective budgeted financial years are \$240M, \$250M, \$263M & \$276M respectively and it is intended to work closely with the customers to have timely collections.

Although the budget has a total expense of \$174M, \$179.5M, \$185..3M and \$191M respectively, just over \$90.67M of this amount does not include cash movement, thus the Company projects to contribute surplus average net cash flow in 2021 of approximately \$124M to the UDC Treasury to be used by the UDC to undertake its mandate to make development happen in its designated areas.

Fixed Assets

The RBWC Board has approved an expenditure of J\$8.8M to replace assets during the year 2020/2021.

Please see detailed Budget attached

Plans for Growth and Expansion

The Company is currently exploring the possibility of:

1. There are major hotels and housing development plans for the area approximately 5 kilometers from the RBWC. The Company is exploring opportunities to expand here.
2. To request from the OUR same percentage rate increase that is approved for the NWC.
3. To increase the abstraction volume allowed by the WRA licence at Cardiff Hall to meet anticipated demand.

Assumptions of the Budget

The Budget was formulated with the following assumptions:

1. The Company will not be divested but will remain a wholly owned subsidiary of the UDC.
2. The aquifers and wells will continue to provide the water necessary to be abstracted and sold.
3. Our largest customer, the NWC will not develop its own water source but will continue to take water from the RBWC to supply its customers in the area
4. The budget was guided by the parameters set by the MOF as stated below

	2020/21	2021/22	2022/23	2023/24
% Inflation	4.2	4.2	5.0	4.9
% Growth	5.3	6.4	7.4	7.0

2018 – 2019 Performance

The Company was able to meet most of its objectives for the financial year 2018-2019:

Potable Water abstracted, treated and distributed	2.33 Million M ³
Potable Water sold	<u>2.19 Million M³</u>
Unaccounted For Water (U.F.W.)	.13 Million M ³
Unaccounted For Water as a % of total Production	5.58%

For the year ending March 2019 Unaudited Financials:

Sales	\$199.4 Million
Expenses	\$161.4 Million
Net Profit	\$38 Million

Included in expenses was \$56 Million paid to the Parent Company for Management Fees
